

RelaDyne has the capabilities to offer custom blending solutions to consumers with special product needs. For nearly 40 years, the custom blending facility has been blending, packaging and distributing quality automotive, industrial and metalworking lubricants.

The RelaTECH custom blending service is expanding its production facility and continuing its research and development programs that address new markets such as oil-free products, low VOC fluids and biodegradable lubricants.

Solving problems with product design and development to increase your productivity

Provide technical support to customers and products in the field

Competitive product analysis

Over 800 active products with a proven track record

Custom label and specialty packaging options

Ability to manufacture products that competitors no longer offer

Metalworking Fluids and Lubricants

- | | |
|-----------------------------|--------------------------------|
| Semi-Synthetic Coolants | Drawing & Stamping Compounds |
| Synthetic Coolants | Vanishing Oils |
| Soluble Oils | Rust Preventatives |
| Straight Cutting Oils | Gun Drilling Oils |
| Grinding and Polishing Oils | Chlorine Free Coolants & Oils |
| Honing Oils | Quenching & Heat Treating Oils |

Industrial Lubricants

- | | |
|----------------------------|--------------------------------|
| Way & Slide Lubricants | Lubricating Oils |
| Compressor Oils | Synthetic Industrial Oils |
| Industrial Gear Lubricants | Multi-Viscosity Hydraulic Oils |
| AW Hydraulic Oils | Zinc-Free Hydraulic Oils |
| R&O Hydraulic Oils | Food Grade Lubricants |
| Spindle Oils | |

Chain Lubricants

- | | |
|---------------------------------|------------------------------|
| Oven Chain Lubricants | Dry Film Chain Lubricants |
| Synthetic Oven Chain Lubricants | E-Coat Oven Chain Lubricants |
