### **SECTION 5. FIREFIGHTING MEASURES**

Suitable Extinguishing Media:	Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
Unsuitable Extinguishing Media:	No information available.
Specific hazards during firefighting:	Cool closed containers exposed to fire with water spray.
Hazardous Combustion Products:	Carbon oxides (CO, CO <sub>2</sub> ) smoke and irritating vapors as products of incomplete combustion.

Further Information: Prevent fire extinguishing water from contaminating surface water or the ground water system.

## **SECTION 6. ACCIDENTAL RELEASE MEASURE**

Personal precautions, protective equipment and emergency procedures: Use personal protective equipment. Ensure adequate ventilation. Evacuate personnel to safe areas. Material can create slippery conditions.

Environmental Precautions: Do not allow uncontrolled discharge or product into the environment.

Methods and Materials for Containment and Cleaning Up: Prevent further leakage or spillage if safe to do so. Remove all sources of ignition. Soak up with inert absorbent material. Non-sparking tools should be used. Ensure adequate ventilation. Contact the proper local authorities.

## **SECTION 7. HANDLING AND STORAGE**

Advice on Safe Handling: For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area. Use only with adequate ventilation. In case of insufficient ventilation, wear suitable respiratory equipment. Avoid contact with skin, eyes and clothing. Do not ingest. Keep away from heat and sources of ignition. Keep container closed when not in use.

Conditions for Safe Storage: Store in original container. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Keep in a dry, cool and well-ventilated place. Keep in properly labeled containers. To maintain product quality, do not store in heat or direct sunlight.

## **SECTION 8. EXPOSURE CONTROL/PERSONAL PROTECTION**

Components with workplace control parameters

Contains no substances with occupational exposure limit values.

**Engineering Measures:** No special ventilation requirements. Good general ventilation should be sufficient to control workers exposure to airborne containments.

**Personal Protective Equipment  
Respiratory Protection:** Use respiratory protection unless adequate local exhaust ventilation is provided or exposure assessment demonstrates that exposures are within recommended exposure guidelines. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

**Filter Type:** Organic Vapor Filter

**Hand Protection Material:** Neoprene, nitrile, polyvinyl alcohol (PVA), Viton (R).

**Remarks:** Chemical-resistant, impervious gloves complying with approved standards should be work at all times when handling chemical products if a risk assessment indicates this is necessary.

**Eye Protection:** Wear face-shield and protective suit for abnormal processing problems.

**Skin and Body Protection:** Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place.

**Protective Measures:** Wash contaminated clothing before re-use. No special protective equipment required.

**Hygiene Measures:** Remove and wash contaminated clothing and gloves, including the inside, before re-use. Wash face, hands and any exposed skin thoroughly after handling.
